

SITE CAP

for pipe dimensions d 90 mm – d 315 mm and DN 80 – DN 300

QUICK
AND
EASY

The roll ring function enables:

- quick and easy sealing of the pipe during work interruptions
- attachment without chamfering the pipe end and without any lubricant
- sealing up to 1 m water column

The site cap impresses with:

- low weight, thanks to PE material
- sustainability, as it can be reused several times

Your benefit:

- pipe end remains clean for further processing
- faster resumption of pipe processing
- less waste on the construction site
